

Title : - Sensitive information in the web code inspect element (Insp3ct0r)

Description : - In this error the web or source code stores some sensitive information about the website on the client side.

Summary : - Due to this error some sensitive information gets stored in the web code in this case flags.

Steps to Reproduce : -

Step 1 - Open the link <https://jupiter.challenges.picoctf.org/problem/41511/>

Step 2 - Right click on the webpage and go to view page source (or press Ctrl + U)

Step 3 - In the web code at the bottom we can find the first part of the flag and can also see two links for the next two parts of the flag.

Step 4 - Open the first link (mycss.css) and at the bottom we can find the second part of the flag.

Step 5 - Open the second link (myjs.js) and at the bottom we can find the Third and last part of the flag.

Step 6 - Paste all the flag parts in the picoCTF Submit box.

Payload : - None

Impact : - By using this sensitive information present in the web code malicious activities can be performed by the bad guys on the website.

Mitigation :- Don't allow to store the sensitive data in the source code of the webpage on the client side.

Proof of concept : -

First part of the flag

```
<div id="tababout" class="tabcontent">
  <h3>How</h3>
  <p>I used these to make this site: <br/>
    HTML <br/>
    CSS <br/>
    JS (JavaScript)
  </p>
  <!-- Html is neat. Anyways have 1/3 of the flag: picoCTF{tru3_d3 -->
</div>

</body>
</html>
```

Second part of the flag

```
.tablink:hover {
  background-color: #777;
}

.tabcontent {
  color: #111;
  display: none;
  padding: 50px;
  text-align: center;
}

#tabintro { background-color: #ccc; }
#tababout { background-color: #ccc; }

/* You need CSS to make pretty pages. Here's part 2/3 of the flag: t3ct1ve_0r_ju5t */
```

Third part of the flag

```
window.onload = function() {
  openTab('tabintro', this, '#222');
}

/* Javascript sure is neat. Anyways part 3/3 of the flag: lucky?832b0699 */
```
